Apple iPhones want to turn HEIF photos into the new JPEG
2019/07/04

Q: Step back a sec. What is a photo file format again? It's a standard way for computers to store and view pictures. With one, it doesn't matter if you took a photo with an Android phone and then share it with a college roommate with a Windows PC. JPEG, the king of photo formats, has been around for decades, and every computing device out there understands JPEG files. But HEIF is new, so most devices today have no idea how to handle them. For those devices, encountering an HEIF file is like when you visit a country where you don't speak the language.
